# Julie Smith-Galvin

for Town Council

I believe that local government is on the frontlines of today's most pressing issues. Our local actions have a profound influence on public health, economic opportunity, housing, education, climate change and a multitude of other critical areas that directly impact our quality of life. As the current Town Council Vice Chair, I see firsthand the challenges and opportunities we face and have used my professional and interpersonal skills to:

- ✓ **Improve town communications and processes** by advocating for competitive hiring, a new website and expanded videorecording of public meetings.
- ✓ **Support economic development** by voting to hire a Community and Economic Development Director, expanding outdoor dining, and sustaining the town's AAA Bond rating.
- ✓ **Prioritize sustainability** by leading efforts to establish the town's first Environmental Sustainability Committee, promote better bike and walk options, and install Wakefield's first municipal solar project and public electric vehicle chargers.
- ✓ **Increase civic engagement** by expanding opportunities for youth perspectives on town issues and holding regular office hours for residents to share ideas, concerns and feedback.
- ✓ **Protect and respect those in need** by supporting resources to address the opioid crisis, tax relief for seniors and establishing an Emergency Fund for residents to confidentially access.

**There is much more to be done to ensure Wakefield maintains its positive momentum. I remain committed to continuing to build a Wakefield that is livable, inclusive and sustainable for everyone.**

**Local leadership matters!
